George,

Here are the main pieces of DOGGR's response to Jared. There are also numerous email messages forwarding DOGGR documents that pertain to the aquifer exemption (these are being sent directly to ORC). As we noted, it seems like a good idea to put all this information on the "G" for easier access. David

Subject: Deliverables in response to 17 July EPA Letter to Secretaries Laird and Rodriquez

Dear Mr. Blumenfeld,

This is in response to your letter of 17 July to Secretary Laird, California Natural Resources Agency, and Secretary Rodriquez, California Environmental Protection Agency.

Attached please find three documents, a list of wells for which injection into non-hydrocarbon producing aquifers has been permitted by DOGGR (in excel and pdf formats) and a draft work plan for the UIC Program to be finalized soon pending review and discussion with your staff.

We are making good progress with respect to your request for documents pertaining to State requests for aquifer exemptions, EPA's approvals or denials thereof and appeals. A good deal of documentation has been located responsive to the request, including some industry correspondence to Dave Mitchell in support of the appeal referenced in the Mitchell letters, extensive files on aquifer exemption requests made after primacy was granted, and significant other documentation. These are being delivered electronically to Mr. Moffatt of your legal office. Please note, however, that our search is not finished, and we anticipate encountering more documentation fitting your request going forward.

The continuing search for documentation notwithstanding, the attached and the documents delivered to your legal office earlier today address the requested deliverables for the first 30-day period.

As you know I am new to my position and am learning rapidly the significant work ahead. What I am grateful for is the close working relationship that has existed, and is continuing to develop, between your EPA staff and DOGGR and State Water Board staff. Please be assured that the UIC Program, the program review, and potential regulation development that might be required following the review is a top priority for me and my colleagues.

We look forward to continuing our important work together, and I will be back to you thirty days hence with additional deliverables as requested in your letter.

I look forward to meeting you in person when the opportunity presents itself.

Best regards,

Steve
